Bio Systems

Subject index

Volume 34 (1995)

Analogy; Prover precondition **34**, 225

Analytic continuation; Wavelets; Weierstrass product formula **34**, 259

Area search intensity; Foraging and homing behavior; Desert isopods; Systematic search; Stochastic differential equations; Meander paths; Temporal locomotion control; Path integration **34**, 11

Attention; Maternal Antibodies; Idiotypic Networks; Cognition; Immunization; Memory; Lamarckian **34**, 87

Attractors; Neural computation; Chaotic dynamics; Biological models **34**, 173

Beidler; Olfaction; Inhibition; Synergism **34**, 27

Biological models; Neural computation; Chaotic dynamics; Attractors **34**, 173

Biomedical systems; Equilibrium state **34**, 41

Calcium oscillations; Intercellular communication; Glial cell; Solute secretion; Contractility **34**, 65

Cerebellar patients; Human motor control; Computer simulations; Neurological control systems **34**, 129

Chaotic dynamics; Neural computation; Attractors; Biological models **34**, 173

Circuit modeling; Network thermodynamics; Transducers **34**, 47

Cognition; Maternal Antibodies; Idiotypic Networks; Attention; Immunization; Memory; Lamarckian **34**, 87

Computer simulations; Human motor control; Cerebellar patients; Neurological control systems **34**, 129

Computer vision; Shape recognition; Image understanding; Geometric modeling; Differential topology; Perception; Pattern recognition **34**, 197

Conformation; Dehydro-alanine; Peptide design; α, β-Dehydro residues **34**, 143

Consciousness; Living state; Sleep **34**, 149

Contractility; Intercellular communication; Glial cell; Calcium oscillations; Solute secretion **34**, 65

Credit apportionment; Neural nets; Evolutionary learning; Learning algorithms **34**, 161

α,β-Dehydro residues; Dehydro-alanine; Peptide design; Conformation **34**, 143

Dehydro-alanine; Peptide design; α, β-Dehydro residues; Conformation **34**, 143

Desert isopods; Foraging and homing behavior; Systematic search; Area search intensity; Stochastic differential equations; Meander paths; Temporal locomotion control; Path integration **34**, 11

Differential topology; Computer vision; Shape recognition; Image understanding; Geometric modeling; Perception; Pattern recognition **34**, 197

Equilibrium state; Biomedical systems **34**, 41

Evolutionary learning; Neural nets; Credit apportionment; Learning algorithms **34**, 161

Eye movements; Smooth pursuit; Prediction mechanisms; Short-term prediction; Long-term prediction; Optimal predictor; Primate **34**, 107

Foraging and homing behavior; Desert isopods; Systematic search; Area search intensity; Stochastic differential equations; Meander paths; Temporal locomotion control; Path integration **34**, 11

Geometric modeling; Computer vision; Shape recognition; Image understanding; Differential topology; Perception; Pattern recognition **34**, 197

Glial cell; Intercellular communication; Calcium oscillations; Solute secretion; Contractility **34**, 65

Human motor control; Cerebellar patients; Computer simulations; Neurological control systems **34**, 129

Idiotypic Networks; Maternal Antibodies; Attention; Cognition; Immunization; Memory; Lamarckian **34**, 87

Image understanding; Computer vision; Shape recognition;

Geometric modeling; Differential topology; Perception; Pattern recognition **34**, 197

Immunization; Maternal Antibodies; Idiotypic Networks; Attention; Cognition; Memory; Lamarckian **34**, 87

Inhibition; Olfaction; Synergism; Beidler **34**, 27

Intercellular communication; Glial cell; Calcium oscillations; Solute secretion; Contractility **34**, 65

Lamarckian; Maternal Antibodies; Idiotypic Networks; Attention; Cognition; Immunization; Memory **34**, 87

Learning algorithms; Neural nets; Evolutionary learning; Credit apportionment **34**, 161

Living state; Sleep; Consciousness **34**, 149

Long-term prediction; Eye movements; Smooth pursuit; Prediction mechanisms; Short-term prediction; Optimal predictor; Primate **34**, 107

Maternal Antibodies; Idiotypic Networks; Attention; Cognition; Immunization; Memory; Lamarckian **34**, 87

Meander paths; Foraging and homing behavior; Desert isopods; Systematic search; Area search intensity; Stochastic differential equations; Temporal locomotion control; Path integration **34**, 11

Memory; Maternal Antibodies; Idiotypic Networks; Attention; Cognition; Immunization; Lamarckian **34**, 87

Network thermodynamics; Circuit modeling; Transducers **34**, 47

Neural computation; Chaotic dynamics; Attractors; Biological models **34**, 173

Neural nets; Evolutionary learning; Credit apportionment; Learning algorithms **34**, 161

Neurological control systems; Human motor control; Cerebellar patients; Computer simulations **34**, 129

Olfaction; Inhibition; Synergism; Beidler **34**, 27

Optimal predictor; Eye movements; Smooth pursuit; Prediction mechanisms; Short-term prediction; Long-term prediction; Primate **34**, 107

Path integration; Foraging and homing behavior; Desert isopods; Systematic search; Area search intensity; Stochastic differential equations; Meander paths; Temporal locomotion control **34**, 11

Pattern recognition; Computer vision; Shape recognition; Image understanding; Geometric modeling; Differential topology; Perception **34**, 197

Peptide design; Dehydro-alanine; α,β-Dehydro residues; Conformation **34**, 143

Perception; Computer vision; Shape recognition; Image understanding; Geometric modeling; Differential topology; Pattern recognition **34**, 197

Prediction mechanisms; Eye movements; Smooth pursuit; Short-term prediction; Long-term prediction; Optimal predictor; Primate **34**, 107

Primate; Eye movements; Smooth pursuit; Prediction mechanisms; Short-term prediction; Long-term prediction; Optimal predictor **34**, 107

Prover precondition; Analogy **34**, 225

Shannon sampling; Wavelets **34**, 249

Shape recognition; Computer vision; Image understanding; Geometric modeling; Differential topology; Perception; Pattern recognition **34**, 197

Short-term prediction; Eye movements; Smooth pursuit; Prediction mechanisms; Long-term prediction; Optimal predictor; Primate **34**, 107

Sleep; Living state; Consciousness **34**, 149

Smooth pursuit; Eye movements; Prediction mechanisms; Short-term prediction; Long-term prediction; Optimal predictor; Primate **34**, 107

Solute secretion; Intercellular communication; Glial cell; Calcium oscillations; Contractility **34**, 65

Stochastic differential equation; Foraging and homing behavior; Desert isopods; Systematic search; Area search intensity; Meander paths; Temporal locomotion control; Path integration **34**, 11

Synergism; Olfaction; Inhibition; Beidler **34**, 27

Systematic search; Foraging and homing behavior; Desert isopods; Area search intensity; Stochastic differential equations; Meander paths; Temporal locomotion control; Path integration **34**, 11

Temporal locomotion control; Foraging and homing behavior; Desert isopods; Systematic search; Area search intensity; Stochastic differential equations; Meander paths; Path integration **34**, 11

Transducers; Network thermodynamics; Circuit modeling **34**, 47

Wavelets; Analytic continuation; Weierstrass product formula **34**, 259

Wavelets; Shannon sampling **34**, 249

Weierstrass product formula; Analytic continuation; Wavelets **34**, 259
